## CIMPRESS' UPPERMOST FINANCIAL OBJECTIVE

Our uppermost financial objective is to maximize our intrinsic value per share ("IVPS"). We define IVPS as (a) the unlevered free cash flow per diluted share that, in our best judgment, will occur between now and the long-term future, appropriately discounted to reflect our cost of capital, minus (b) net debt per diluted share. We define unlevered free cash flow as adjusted free cash flow plus cash interest expense related to borrowing.

We endeavor to make all financial decisions in service of this priority. As such, we often make decisions that could be considered non-optimal were they to be evaluated based on other criteria such as (but not limited to) near- and mid-term revenue, operating income, net income, EPS, adjusted EBITDA, and cash flow.

IVPS is inherently long term in nature. Thus an explicit outcome of this is that we accept fluctuations in our financial metrics as we make investments that we believe will deliver attractive long-term returns on investment.

## OUR STRATEGY

Cimpress invests in and builds customer-focused, entrepreneurial, mass customization businesses for the long term, which we manage in a decentralized, autonomous manner.

We drive competitive advantage across Cimpress through a select few shared strategic capabilities that have the greatest potential to create company-wide value.

We limit all other central activities to only those which absolutely must be performed centrally.

## OUR CAPITAL ALLOCATION PHILOSOPHY

Cimpress has historically deployed capital via organic investments, share repurchases, acquisitions and equity investments, and debt reduction. We have not paid a dividend and we do not intend to for the foreseeable future. We consider capital to be fungible across all of these categories; we do not favor one over the other, but rather seek to grow our IVPS by allocating capital across these categories in function of the relative returns of current and expected future opportunities.

We delegate to our businesses and central teams capital allocation decisions that our operational executives expect to pay back in less than twelve months. For capital allocation with pay back beyond that time frame, we evaluate the relative returns of potential uses of capital. The executives that lead most of our businesses are incentivized based on the long-term returns on invested capital generated in their business. The remainder, most of whom are in our Vista reporting segment or central functions, are primarily incentivized through Cimpress share-based compensation.

We seek to deliver a weighted average return on our portfolio of deployed capital, net of failures, that is materially above our weighted average cost of capital (WACC). In support of this objective, we vary the hurdle rates that we use at the time of investment decisions in function of our judgment of the risks to various types of investment. Hurdle rates for investments may also vary based on leverage levels and external factors.

We recognize that a portfolio of investments that exceeds our WACC does not necessarily mean, by itself, that we have made good capital allocation decisions. We compare our returns against the opportunity cost of potentially higher returns that might have come from deploying the same capital into even higher-returning opportunities of a similar risk level. This more stringent measure of performance clarifies the cost of mistakes which we have made in the past.

Dear Investor,
Our third quarter financial results were strong, better than the guidance we provided in our mid-year update call on March 24, 2023. Consolidated revenue grew $13 \%$ on a reported basis and $16 \%$ on an organic constant-currency basis. Vista drove this sequential acceleration as its product mix shifted seasonally back toward faster-growing small business products and we passed the anniversary of a weaker prior-year quarter that included the migration of Vista's U.S. website onto the new technology platform.

Revenue growth including year-over-year increases in pricing, combined with stabilizing input costs, led to strong gross profits and relatively flat gross margins versus the year-ago period. The tables below show the year-over-year change in quarterly and year-to-date revenue and gross profit by segment for Q3 FY2023:

|  | Change Q3 FY2023 versus Q3 FY2022 |  |  |  |  |

| Total | $6 \%$ | $\mathbf{1 1 \%}$ | $\mathbf{1 \%}$ | $\mathbf{5} \%$ |  |

Q3 FY2023 advertising and operating expenses both decreased as a percentage of revenue. Operating loss improved $\$ 16.2$ million year over year despite a restructuring charge of $\$ 30.1$ million in the current quarter from recent cost-savings actions. Adjusted EBITDA grew $\$ 35.5$ million year over year to $\$ 69.1$ million; this was higher than the guidance of $\$ 60$ million to $\$ 62$ million we provided in our March investor update.

Operating cash flow and adjusted free cash flow for the quarter increased year over year by $\$ 60.8$ million and $\$ 68.2$ million, respectively. We maintained ample liquidity of $\$ 189.8$ million in cash and marketable securities at March 31, 2023, which was significantly higher than the guidance we provided of $\$ 135$ million to $\$ 145$ million as a result of the strong adjusted EBITDA and adjusted free cash flow results. Net leverage of 4.83 times trailing-twelve-month EBITDA as defined by our credit agreement was lower sequentially due to improved profitability and the pro forma benefit of a portion of our recent cost reduction actions we announced in March.

Our improved Q3 FY2023 profitability was prior to any material impact of those cost reduction actions for which the benefits will further support year-over-year expansion of adjusted EBITDA in Q4 FY2023 and FY2024. We continue to expect annualized cost reduction benefits of about $\$ 100$ million excluding restructuring charges, consistent with the guidance we provided on March 24, 2023. Our current outlook for operating income and adjusted EBITDA for the remainder of FY2023 and FY2024 is as follows:

|  | Profitability Outlook as of April 26, 2023 |  |  |
| :--- | :---: | :---: | :---: |
|  | Q4 FY2023 | FY2023 | FY2024 |
| Operating income | $\$ 33$ million to $\$ 37$ million | $\$ 36$ million to $\$ 40$ million | At least $\$ 195$ million |
| Adjusted EBITDA | $\$ 90$ million to $\$ 94$ million | $\$ 316$ million to $\$ 320$ million | At least $\$ 400$ million |

This guidance for Q4 FY2023 profitability has been increased based on recent operating performance. We expect the profitability expansion in Q4 FY2023 to be accompanied by seasonally strong free cash flow conversion, even after restructuring payments. For FY2024, we continue to expect our adjusted EBITDA to convert to adjusted free cash flow at approximately $40 \%$. We also continue to expect we will reduce our net leverage as defined by our credit agreement to below $4.5 x$ by the end of FY2023, and to below $3.5 x$ by the end of FY2024.

We believe that many of the investments we have made over the past few years have given us the talent, capabilities and competitive advantages to significantly improve the value that we deliver to our customers. Over the coming years the revenue growth that we expect this customer value will drive, combined with our cost reduction actions, should improve our steady-state free cash flow and expand our options for capital structure and capital allocation.

Sean and I look forward to taking your questions about our financial results on our public earnings call tomorrow, April 27, 2023 at 8:00 am ET, which you can join using the link on the events section of ir.cimpress.com. You may presubmit questions by emailing ir@cimpress.com, and you may also ask questions via chat during the live call.

Sincerely,

Robert S. Keane
Founder, Chairman \& CEO

(2) Basic and diluted shares are the same in certain periods where we reported a GAAP net loss.

## INCOME STATEMENT HIGHLIGHTS

Our reported revenue grew 13\% for Q3 and organic constant-currency revenue grew $16 \%$, with double-digit growth across most of our businesses.

We recorded a GAAP operating loss of $\$ 12.2$ million compared to an operating loss of $\$ 28.4$ million in the yearago period. Gross profit increased $\$ 37.3$ million on higher volume, improved pricing and an easing of year-over-year inflationary pressures. We also drove efficiencies in operating expenses including in advertising. Additionally, operating income included a $\$ 1.7$ million year-over-year benefit from the cost reduction actions taken and disclosed in March 2023. All of these factors were partially offset by a $\$ 26.7$ million year-over-year increase in restructuring expense related to those recent cost reduction actions.

Adjusted EBITDA for Q3 FY2023 was $\$ 69.1$ million, up $\$ 35.5$ million from $\$ 33.6$ million in Q3 FY2022 as most of the items described in operating income above also influence adjusted EBITDA (with the exception of restructuring expenses that are not included in adjusted EBITDA). Additionally, we use derivative contracts to hedge the economic currency risk within adjusted EBITDA, and we include any realized gains or losses from these contracts in adjusted EBITDA. The net impact of year-overyear currency movements on adjusted EBITDA was favorable in Q3 FY2023 by $\$ 1.6$ million.

GAAP net (loss) income per diluted share for the third quarter was $\$(1.88)$, versus $\$(2.75)$ in the same quarter a year ago. In addition to the improved operating loss, our income tax expense was significantly lower year-over-year in Q3 FY2023. These positive trends were partially offset by increased interest expense and a year-over-year impact from the net effect of realized currency gains and unrealized currency losses in other income (expense), net (details on page 21).

## Revenue \& Reported Revenue Growth (Decline)

Organic Constant-Currency Revenue Growth (Decline)

GAAP Operating Income (Loss) (\$M)
\& Margin (\%) (Quarterly)

Adjusted EBITDA (\$M) \& Margin (\%) (Quarterly)

## INCOME STATEMENT HIGHLIGHTS (CONTINUED)

Gross profit (revenue minus the cost of revenue) increased year over year by $\$ 37.3$ million in the third quarter as revenue growth, including from pricing increases and volume growth, outpaced the negative impacts of currency movements and inflationary pressures. As a reminder, we started to see significant increases to material, energy and labor costs midway through FY2022, so we are now passing the anniversary of many of those increases, and those cost pressures are subsiding.

Gross margin (revenue minus the cost of revenue expressed as a percent of revenue) in the third quarter was $46.8 \%$, down 30 bps compared to Q3 FY2022.

Contribution profit (revenue minus the cost of revenue, advertising and payment processing) increased year over year by $\$ 35.2$ million in the third quarter, due to gross profit increases and relatively flat advertising spend (advertising expense increased modestly from $\$ 96.7$ million in Q3 FY2022 to $\$ 97.5$ million in Q3 FY2023).

Contribution margin (revenue minus the cost of revenue, the cost of advertising and payment processing, expressed as a percent of revenue) in the third quarter was $31.8 \%$, up from $30.6 \%$ in the same quarter a year ago as the slight decline in gross margin was more than offset by lower advertising as a percent of revenue.

Advertising as a percent of revenue decreased year over year for the third quarter from $14.7 \%$ to $13.1 \%$ driven by a year-over-year decrease in Vista.

## CASH FLOW

We generated $\$ 12.6$ million of cash from operations in Q3 FY2023, compared to a use of $\$ 48.2$ million in the yearago period. In addition to the $\$ 35.5$ million increase to adjusted EBITDA described on page 10, working capital was more favorable than the prior year driven by movements in accounts payable and accrued expenses relative to the year-ago period, which were influenced by lower advertising spend payments following our Q2 seasonal peak. Cash restructuring payments were $\$ 5.0$ million higher than the year-ago period, cash interest payments were $\$ 4.0$ million higher than the year-ago period, and cash tax payments were $\$ 4.6$ million higher.

As described previously, during Q1 FY2023, we built up safety stock inventory ahead of the seasonal peak and also to mitigate risk of material shortages in Europe connected to potential energy disruption. During Q3 FY2023 we continued to work that inventory down as planned, leading to cash inflows for inventory of $\$ 23.7$ million. However, this was partially offset by payments to suppliers for those materials. We expect further working capital benefit from the reduction of this safety stock inventory over the next several quarters.

Adjusted free cash flow was an outflow of $\$ 13.3$ million in the third quarter of FY2023 compared to an outflow of $\$ 81.5$ million in the same period a year ago. Adjusted free cash flow improved as a result of the increase in our operating cash flow described above, as well as a decline of $\$ 4.6$ million in capital expenditures year over year, and a decline of $\$ 2.8$ million in capitalized software expense.

For our internal management reporting and budgeting we use unlevered free cash flow, which we define as adjusted free cash flow plus cash interest, net. The charts at the right illustrate these components on a quarterly and trailing-twelve-month basis.

As of March 31, 2023, our total debt, net of issuance costs, was $\$ 1,693.4$ million. Net debt, excluding issuance costs, other debt discounts and premiums, and net of cash, cash equivalents and current and non-current marketable securities, was $\$ 1,520.4$ million, up from $\$ 1,493.5$ million as of December 31, 2022, as a result of the cash outflows in the quarter described on page 12.

Our capital structure includes significant liquid assets on our balance sheet and, therefore, we look at net leverage instead of gross leverage. The calculation of our debt-covenant-defined leverage ratio (net debt to trailing-twelvemonth EBITDA) uses definitions of both debt and EBITDA that differ from the corresponding figures reported in this document. Our consolidated net leverage ratio as calculated per our credit agreement was 4.83 as of March 31, 2023, a decrease from 5.52 as of December 31, 2022. Our first lien net leverage ratio was 2.97 as of March 31, 2023, down from 3.34 at December 31, 2022. The decrease in leverage since December 31, 2022 is primarily due to an increase in trailing-twelve-month EBITDA, including an allowable pro forma benefit for a portion of the cost reduction actions that we took in March. We remain committed to reducing our net leverage significantly through adjusted EBITDA expansion and reducing net debt, and we expect our liquidity to build from the $\$ 189.8$ million of cash and marketable securities we had as of March 31, 2023 in line with our previously disclosed plans.

Our capital structure contains a mix of fixed and variablerate debt. In order to mitigate our exposure to interest rate changes related to our variable-rate debt, we execute interest rate swap contracts to fix the interest rate on a portion of our outstanding or forecasted long-term debt with varying maturities. As of March 31, 2023, we had \$1,102.5 million of variable-rate debt, and interest rate swap contracts with a notional value of $\$ 400.0$ million already accruing interest. A hypothetical 100 basis point increase in rates following March 31, 2023, inclusive of our outstanding interest rate swaps, would result in a $\$ 7.7$ million impact to interest expense over the next 12 months. This does not include any yield we get from cash and marketable securities.

We did not repurchase any shares or bonds in Q3 FY2023.

## Consolidated Net Leverage Ratio*

*Consolidated Leverage Ratio as calculated per our credit agreement definitions.

## SEGMENT RESULTS

## VISTA

Vista's Q3 FY2023 revenue grew 14\% year over year on a reported basis and $16 \%$ on an organic constantcurrency basis. New customer count and new customer bookings grew across all major markets, as did repeat customer bookings. Promotional products, apparel, and gifts was our fastest-growing product category, with business cards, marketing materials, packaging and labels, and signage all showing strong year-over-year growth as well. Revenue was negatively impacted by a year-over-year decline in face mask sales of $\$ 1.7$ million and a decline in reported revenue from Japan of $\$ 2.1$ million as we shut down that business in Q1 FY2023.

Vista segment EBITDA grew year over year by $\$ 34.9$ million in Q3 FY2023 through a combination of factors, including revenue growth from pricing changes and volume growth. Gross margins were flat year over year as inflationary pressure began to stabilize and pricing has improved.

Vista's advertising spend decreased $\$ 4.1$ million year over year, and as a percent of revenue decreased from $17.6 \%$ in the prior-year quarter to $14.5 \%$ in Q3 FY2023, as a result of increased efficiency and a reduction of spend in non-core categories. We expect quarter-to-quarter fluctuations in advertising as a percentage of revenue depending on the intensity and timing of mid- and upper-funnel spend programs. As outlined in our mid-year investor update, in H1 FY2023 we tested a higher mix of mid- and upperfunnel advertising spend compared to lower-funnel spend, which we believe should help us improve awareness and consideration with customers and prospects and reduce our reliance on paid search advertising. The learnings from these tests will help to inform an evolved mix of spend going forward.

Additionally, we delivered operating expense efficiencies this quarter in Vista, including a $\$ 1.4$ million benefit from the cost reductions we implemented and announced in March.

Currency fluctuations had an immaterial impact on Vista segment EBITDA for Q3 FY2023.

## UPLOAD AND PRINT

Financial results for PrintBrothers and The Print Group are presented on page 6 of this document, as well as on the next page.

Combined upload and print revenue (i.e., the combination of revenue for PrintBrothers and The Print Group, adjusted to exclude inter-segment revenue when conducted between businesses in these segments) in Q3 FY2023 grew year over year by $15 \%$ at reported currency rates, or $21 \%$ on an organic constant-currency basis. These businesses continue to execute well, with growth from higher pricing and, for our largest businesses in these segments, significantly higher new customer and overall order volumes. Growth has begun to moderate as we have begun to lap the year-ago period in which we began to increase prices.

Combined upload and print EBITDA increased year over year by $21 \%$, or $\$ 5.2$ million, in Q3 FY2023, as revenue growth translated to gross profit and contribution profit increases, while operating expenses grew more modestly. Year-over-year currency fluctuations had an approximately $\$ 1.1$ million negative impact on combined upload and print EBITDA in the third quarter. As a reminder, realized gains or losses on currency hedges that we include in adjusted EBITDA are not allocated to segment-level EBITDA.

On a year-to-date basis for FY2023, the impact of currency fluctuations negatively impacted combined upload and print EBITDA by $\$ 8.8$ million.

## NATIONAL PEN

National Pen's Q3 FY2023 revenue grew 12\% year over year on a reported basis and $15 \%$ on an organic constantcurrency basis, with significant growth in e-commerce and distributor channels, as well as sales to other Cimpress businesses.

Segment EBITDA decreased year over year by $\$ 2.4$ million in Q3 FY2023. Gross profits grew year over year, but the margin was lower as a result of some temporary duplicative overhead costs as European production is in process of moving to a lower-cost market, as well as the impact of product mix shifts. Year-over-year movements in currency rates negatively impacted National Pen segment EBITDA by $\$ 1.1$ million. As a reminder, realized gains or losses on currency hedges that we include in adjusted EBITDA are not allocated to segment-level EBITDA.

On a year-to-date basis for FY2023, the impact of currency fluctuations negatively impacted National Pen segment EBITDA by $\$ 6.5$ million.

Segment EBITDA (Loss) (\$M) \& Segment EBITDA (Loss) Margin Quarterly

## ALL OTHER BUSINESSES

Revenue in our All Other Businesses segment grew 1\% year over year in Q3 on both a reported basis and an organic constant-currency basis. BuildASign generates the majority of revenue in this segment, and revenue in this business was flat year over year, with mixed performance by product line. Printi delivered solid revenue growth in Q3.

Q3 FY2023 segment EBITDA declined by $\$ 1.0$ million year over year as a result of increased labor and marketing costs, in combination with lower revenue growth, in BuildASign. The year-over-year segment EBITDA benefit from exiting our business in China earlier this year was \$0.4M in Q3 FY2023.

## BUSINESSES IN THIS REPORTABLE SEGMENT:

Following the exit of our business in China, which we completed in early Q3 FY2023 and is therefore still included in year-over-year organic comparisons, this reportable segment includes only BuildASign and Printi.

BuildASign is an e-commerce provider of canvas-print wall décor, business signage and other large-format printed products, based in Austin, Texas. In Q4 FY2021, BuildASign acquired a small business in a new product category.
Printi, the online printing leader in Brazil, offers a superior customer experience with transparent and attractive pricing, reliable service and quality.

## CENTRAL AND CORPORATE COSTS

Central and corporate costs decreased 5\% year over year in Q3 FY2023 from $\$ 36.1$ million to $\$ 34.4$ million. Unallocated share-based compensation (SBC) drove a $\$ 5.8$ million year-over-year benefit in this cost category due to accounting timing of older grants that is more favorable than the straight-line expense that we allocate to our segments.

Excluding unallocated SBC, central and corporate costs were up $12 \%$, or $\$ 4.1$ million, year over year during the third quarter, due to volume-related increases to central operating costs and increased corporate costs, partially offset by year-over-year currency benefits.

| NHAT ARE CENTRAL AND CORPORATE COSTS? |  |
| :---: | :---: |
| Unallocated Share Based Comp | The GAAP accounting value of performance share units (PSUs) across Cimpress, minus what we cross-charge either to our businesses or to the above central cost categories. We cross-charge the cash grant value of a long-term incentive award. |
| $\begin{gathered} \text { MCP } \\ \text { Investment } \end{gathered}$ | Software engineering and related costs to expand the functionality of our mass customization platform (MCP). |
| Central Operating Costs | Our operationally oriented shared-service organizations of (1) global procurement, (2) the technical maintenance and hosting of the MCP, (3) privacy and information security managemen and (4) the administrative costs of our Cimpress India offices where numerous Cimpress businesses have dedicated business-specific team members. These costs are required to operate our businesses. |
| Corporate Costs | Corporate activities, including the office of the CEO, the board, directors and officers insurance, treasury, tax, capital allocation, financial consolidation, audit, corporate legal, internal company-wide communications, investor relations and corporate strategy. |

[^0]
## CURRENCY IMPACTS

Changes in currency rates negatively impacted our year-over-year reported revenue growth by about 300 basis points in Q3 FY2023. There are many natural expense offsets in local currencies in our business, so the net currency impact to our bottom line is less pronounced than it is to revenue. We look at constant-currency growth rates to understand revenue trends excluding currency changes.

Our most significant net currency exposures by volume are the Euro and the British Pound (GBP). We enter into currency derivative contracts to hedge the risk for certain currencies where we have a net adjusted EBITDA exposure. Our hedging approach results in hedging close to $100 \%$ of our forecasted Euro and GBP net exposures for the upcoming 12 months, with a declining hedge percentage out to 24 months. For certain other currencies with a smaller net impact, we hedge close to $100 \%$ of our forecasted net exposures for the upcoming 6 months, with a declining hedge percentage out to 15 months. We hedge our adjusted EBITDA exposures because a slightly different but similar EBITDA measure is the primary metric normally used in our debt covenants.

We do not apply hedge accounting to these hedges, which increases the volatility of the gains or losses that are included in our net income from quarter to quarter.
Realized and unrealized gains or losses from these hedges are recorded in Other income (expense), net, along with other currency-related gains or losses. The realized gains or losses on our hedging contracts are added to our adjusted EBITDA to show the economic impact of our hedging activities.

Our Other income (expense), net was $\$ 1.4$ million in Q3 FY2023, mainly driven by:

- Realized gains on certain currency hedges intended to hedge EBITDA were $\$ 4.8$ million for the third quarter. These realized gains affect our net income, adjusted EBITDA, and adjusted free cash flow. They are not allocated to segment-level EBITDA.
- Net losses were $\$ 3.4$ million in Q3, primarily related to unrealized losses on the revaluation of currency derivatives, and intercompany, cash and debt balances. These are included in our net income but excluded from our adjusted EBITDA.

Overall, for the reasons described above, year-over-year fluctuations in currencies create different impacts on the various financial results you see throughout this document. At the top right of this page is a table describing these directional net currency impacts when compared to the prior-year period.

|  | Y/Y Impact from Currency* |  |
| :--- | :---: | :---: |
| Financial Measure | Q3 FY2023 | YTD Q3 FY2023 |
| Revenue | Negative | Negative |
| Operating income | Neutral | Negative |
| Net income | Negative | Negative |
| Segment EBITDA | Mixed by segment | Mixed by segment |
| Adjusted EBITDA | Positive | Positive |
| Adjusted free cash flow | Positive | Positive |

*Net income includes both realized and unrealized gains or losses from currency hedges and intercompany loan balances. Adjusted EBITDA includes only realized gains or losses from certain currency hedges. Adjusted free cash flow includes realized gains or losses on currency hedges as well as the currency impact of the timing of receivables, payments and other working capital settlements. Revenue, operating income and segment EBITDA do not reflect any impacts from currency hedges or balance sheet translation.

## ABOUT NON-GAAP FINANCIAL MEASURES:

To supplement Cimpress' consolidated financial statements presented in accordance with U.S. generally accepted accounting principles, or GAAP, Cimpress has used the following measures defined as non-GAAP financial measures by Securities and Exchange Commission, or SEC, rules: Constant-currency revenue growth, constant-currency revenue growth excluding revenue from acquisitions and divestitures made during the last twelve months, upload and print group revenue growth, constant-currency gross profit growth, adjusted EBITDA, adjusted free cash flow and cash interest, net:

- Constant-currency revenue growth is estimated by translating all non-U.S. dollar denominated revenue generated in the current period using the prior year period's average exchange rate for each currency to the U.S. dollar.
- Constant-currency revenue growth excluding revenue from acquisitions and divestitures made during the past twelve months excludes the impact of currency as defined above. The organic constant-currency growth rate excludes 99designs revenue from Q2 FY2021 through Q1 FY2022, Depositphotos/VistaCreate revenue from Q2 FY2022 through Q1 FY2023, and the revenue from several small acquired businesses for the first year after acquisition.
- Upload and print group revenue growth is the combination of revenue for PrintBrothers and The Print Group in USD, adjusted to exclude inter-segment revenue when conducted between businesses in these segments. Upload and print group constant-currency revenue growth is the combination of revenue for PrintBrothers and The Print Group in constant currencies, adjusted to exclude inter-segment revenue when conducted between businesses in these segments. Upload and print group EBITDA is the combination of segment EBITDA for PrintBrothers and The Print Group.
- Constant-currency gross profit growth is estimated by translating all non-U.S. dollar denominated revenue and cost of revenue generated or incurred in the current period using the prior year period's average exchange rate for each currency to the U.S. dollar.
- Adjusted EBITDA is defined as operating income plus depreciation and amortization plus share-based compensation expense plus proceeds from insurance plus earn-out related charges plus certain impairments plus restructuring related charges plus realized gains or losses on currency derivatives.
- Adjusted free cash flow is defined as net cash provided by operating activities less purchases of property, plant and equipment, purchases of intangible assets not related to acquisitions, and capitalization of software and website development costs, plus payment of contingent consideration in excess of acquisition-date fair value, plus gains on proceeds from insurance.
- Cash interest, net is cash paid for interest, less cash received for interest.

These non-GAAP financial measures are provided to enhance investors' understanding of our current operating results from the underlying and ongoing business for the same reasons they are used by management. For example, as we have become more acquisitive over recent years we believe excluding the costs related to the purchase of a business (such as amortization of acquired intangible assets, contingent consideration, or impairment of goodwill) provides further insight into the performance of the underlying acquired business in addition to that provided by our GAAP operating income. As another example, as we do not apply hedge accounting for our currency forward contracts, we believe inclusion of realized gains and losses on these contracts that are intended to be matched against operational currency fluctuations provides further insight into our operating performance in addition to that provided by our GAAP operating income. We do not, nor do we suggest that investors should, consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. For more information on these non-GAAP financial measures, please see the tables captioned "Reconciliations of Non-GAAP Financial Measures" included at the end of this document. The tables have more details on the GAAP financial measures that are most directly comparable to non-GAAP financial measures and the related reconciliation between these financial measures.

## CONSTANT-CURRENCY REVENUE GROWTH RATES

| Total income (loss) from operations | \$ (15.7) | \$ 9.0 | \$ 16.9 | \$ 86.0 | \$ (28.4) | \$ (27.2) | \$(18.0) | \$ 33.6 | \$(12.2) |
| Operating income (loss) margin | (3)\% | 1 \% | $3 \%$ | $10 \%$ | (4)\% | (4)\% | (3)\% | $4 \%$ | (2)\% |
| Operating income (loss) year-over-year growth | 82 \% | 376 \% | (53)\% | (9)\% | 81 \% | (401)\% | (206)\% | (61)\% | $57 \%$ |

${ }^{1}$ SBC expense listed here excludes the portion included in restructuring-related charges to avoid double counting.
${ }^{2}$ This metric uses the definition of adjusted EBITDA as outlined above and therefore does not include the pro-forma impact of acquisitions, divestitures or the annualized benefit from actioned cost saving initiatives; however, our debt covenants allow for the inclusion of pro-forma impacts to adjusted EBITDA.
${ }^{3}$ Adjusted EBITDA includes $100 \%$ of the results of our consolidated subsidiaries and therefore does not give effect to adjusted EBITDA attributable to noncontrolling interests. This is to most closely align to our debt covenant and cash flow reporting.

[^1]
## ADJUSTED EBITDA OUTLOOK

(in millions)

|  | Q4 FY2023 <br> (at midpoint) | FY2023 <br> (at midpoint) | FY2024 <br> (at least...) |
| :--- | :---: | :---: | :---: |
| GAAP operating income (loss) | $\$ 35.0$ | $\$ 38.4$ | $\$ 195.5$ |
| Depreciation and amortization | $\$ 40.0$ | $\$ 161.6$ | $\$ 155.0$ |
| Share-based compensation expense $^{1}$ | $\$ 10.0$ | $\$ 39.3$ | $\$ 40.0$ |
| Certain impairments and other adjustments $^{2}$ | $\$-$ | $\$ 2.0$ | $\$-$ |
| Restructuring related charges | $\$ 2.0$ | $\$ 45.1$ | $\$-$ |
| Realized gains (losses) on currency derivatives not included in operating income | $\$ 5.0$ | $\$ 31.6$ | $\$ \$ 9.5$ |
| Adjusted EBITDA ${ }^{2,3}$ | $\$ 92.0$ | $\$ 318.0$ | $\$ 400.0$ |

${ }^{1}$ SBC expense listed here excludes the portion included in restructuring-related charges to avoid double counting.
${ }^{2}$ This metric uses the definition of adjusted EBITDA as outlined above and therefore does not include the pro-forma impact of acquisitions, divestitures or the annualized benefit from actioned cost saving initiatives; however, our debt covenants allow for the inclusion of pro-forma impacts to adjusted EBITDA.
${ }^{3}$ Adjusted EBITDA includes $100 \%$ of the results of our consolidated subsidiaries and therefore does not give effect to adjusted EBITDA attributable to noncontrolling interests. This is to most closely align to our debt covenant and cash flow reporting.

## SAFE HARBOR STATEMENT:

This earnings commentary contains statements about our future expectations, plans, and prospects of our business that constitute forward-looking statements for purposes of the safe harbor provisions under the Private Securities Litigation Reform Act of 1995, including our expectations for the growth and development of our businesses, revenue, profitability, income, cash flows, and other financial results, including our outlook for fiscal years 2023 and 2024; expected effects of our cost reductions on our financial results, including anticipated costs savings; anticipated revenue growth and customer value improvements; the expected effects of our advertising spend in Vista; our planned reduction in inventory levels and expectations of working capital benefit; our expectations with respect to our leverage position; and the impact of our mass customization platform.

Forward-looking projections and expectations are inherently uncertain, are based on assumptions and judgments by management, and may turn out to be wrong. Our actual results may differ materially from those indicated by the forward-looking statements in this document as a result of various important factors, including but not limited to flaws in the assumptions and judgments upon which our forecasts and estimates are based; the development, duration, and severity of supply chain constraints, inflation, and the lingering effects of the COVID-19 pandemic; our failure to execute on the transformation of the Vista business; the failure of our cost reductions to affect our financial results as expected; costs and disruptions caused by acquisitions; the failure of the businesses we acquire or invest in to perform as expected; our inability to make the investments in our businesses that we plan to make or the failure of those investments to achieve the results we expect; loss of key personnel or our inability to hire and retain talented personnel; our failure to develop and deploy our mass customization platform or the failure of the mass customization platform to drive the performance, efficiencies, and competitive advantage we expect; unanticipated changes in our markets, customers, or businesses; our failure to attract new customers and retain our current customers; our failure to manage the growth and complexity of our business; changes in the laws and regulations, or in the interpretation of laws and regulations, that affect our businesses; our ability to maintain compliance with our debt covenants and pay our debts when due; general economic conditions, including the possibility of an economic downturn in some or all of our markets; and other factors described in our Form 10-K for the fiscal year ended June 30,2022 and the other documents we periodically file with the U.S. SEC.

In addition, the statements and projections in this quarterly earnings document represent our expectations and beliefs as of the date of this document, and subsequent events and developments may cause these expectations, beliefs, and projections to change. We specifically disclaim any obligation to update any forward-looking statements. These forward-looking statements should not be relied upon as representing our expectations or beliefs as of any date subsequent to the date of this document.

[^0]:    *We present this cost category excluding the Unallocated SBC to help our investors see the potential for scale leverage in these central costs without the volatility and accounting complexities of the Unallocated SBC. For avoidance of doubt, we view SBC as a cost, and believe investors should too. As a reminder, we charge our businesses a cost based on the cash value of long-term incentive grants, which excludes some of these accounting complexities, and which is included in each segment's results each period. All numbers are rounded to the nearest million and may not sum to total Central and Corporate Costs when combined with the rounded Unallocated SBC figures in the chart above.

[^1]:    ${ }^{1}$ SBC expense listed here excludes the portion included in restructuring-related charges to avoid double counting.
    ${ }^{2}$ This metric uses the definition of adjusted EBITDA as outlined above and therefore does not include the pro-forma impact of acquisitions, divestitures or the annualized benefit from actioned cost saving initiatives; however, our debt covenants allow for the inclusion of pro-forma impacts to adjusted EBITDA.
    ${ }^{3}$ Adjusted EBITDA includes $100 \%$ of the results of our consolidated subsidiaries and therefore does not give effect to adjusted EBITDA attributable to noncontrolling interests. This is to most closely align to our debt covenant and cash flow reporting.
